## Overview

- Detroit River soft shoreline project update
- Detroit River Shoreline Strategy progress report

# **Detroit River Soft Shoreline Projects**

Essex Region  
Conservation  
Authority

## Shoreline Strategy

- Initiated 2011; completion expected in 2012
- Screening level study to document:
  - Existing current shoreline conditions (structure condition & elevations, biological characteristics)
  - Strategically prioritize shoreline restoration activities
  - Serve as decision making tool (Conservation Authority, municipality, etc.)
- Site assessments completed:
  - Structure condition and elevations
  - Biological characterization
  - Photo documentation

Essex Region  
Conservation  
Authority

## Shoreline Strategy - 2012

- Complete analysis and reporting
  - High priority: reaches in poor condition and high restoration potential
  - Medium priority: reaches in poor condition or high restoration potential
  - Low priority: reaches in good condition and/or low restoration potential
- Municipal partner orientation
- Landowner outreach/follow up
